

Year 2 Activity – Respect the Environment

The Importance of Trees

May 2017

2 Blue and 2 Green students completed a thematic unit on the environment, focusing specifically on trees and their usefulness. In addition to the language skills included in this unit, students had the opportunity to read the true story of Wangari Maathai, the Kenyan environmental activist responsible for one of the largest conservation initiatives in Africa. The unit concluded with each student choosing one new thing they learnt about trees and incorporating it as a slogan into the design of posters.
